

PROFESSIONAL SUMMARY

Graduate Chemical Engineer with industrial exposure in refinery operations, process monitoring, quality control, and industrial safety. Experienced in edible oil refining, palm oil fractionation, and sulphonation plant operations. Strong background in biodiesel production, catalyst synthesis, modelling, and optimization. Seeking NYSC placement in process engineering, plant operations, or energy-related roles.

EDUCATION

University of Benin, Benin City, Nigeria Sept 2023 B.Eng. Chemical Engineering CGPA: 4.3/5.0

INDUSTRIAL EXPERIENCE

Chemical Engineer, PZ Wilmar Nigeria Limited, Lagos 2024–2025

- Supported edible oil refinery operations involving crude palm oil processing.
- Gained exposure to refining, fractionation, separation, and process monitoring.
- Developed understanding of plant workflow, safety, and large-scale operations.

Industrial Training Intern, Reliance Chemical Products Ltd., Agbara Jan 2022 – May 2022

- Completed training in a sulphonation plant producing LABSA-related chemicals.
- Observed plant operations, utilities, workflow monitoring, and safety practices.
- Built foundational experience in industrial process systems.

UNDERGRADUATE RESEARCH

Undergraduate Researcher, University of Benin 2023 *Bio-Based Catalyst Synthesis for Biodiesel Production*

- Developed heterogeneous catalysts from waste materials for biodiesel production.
- Investigated neem seed oil as a renewable feedstock.
- Applied modelling and optimization to improve production efficiency.

TECHNICAL SKILLS

Chemical Engineering: Process operations, quality control, refining, fractionation, process safety **Modelling/Simulation:** Aspen HYSYS, process modelling, optimization **Engineering Tools:** AutoCAD, SolidWorks **Programming/Data:** Python, Rust, C++, JavaScript, SQL **Other Tools:** Git, Docker

ADDITIONAL TECHNICAL EXPERIENCE

Backend / Software Engineer 2023–Present

- Built reliable backend systems with focus on testing and correctness.
- Applied computational skills to modelling, optimization, and data workflows.

OPEN-SOURCE CONTRIBUTIONS

- WebKit: Contributed to WebDriver BiDi implementation.
- can-viewer-rs: Implemented DBC editor and serializer in Rust.
- rusty-caravel / rsomeip: Added parser improvements and integration tests.
